

WILPRO 65

TECHNICAL DATA SHEET

Description :

WILPRO 65 is a proprietary blend of Fish meal, Avian Meal, Vegetable proteins and minerals that are invented and formulated by renowned Scientists and Nutritionists in the Feed sector in the USA to **produce mirror performance of a typical 65% crude protein Fish Meal**. The product has been **designed to duplicate results at a significantly reduced cost to pure fish meal**. The product may be treated with antioxidants as per customer's request.

Package and Storage :

Packaging : 25/50 kg bags
Storage : Store in a cool dry location in an area with fresh, clean, circulating air. Protect from direct sunlight, insect and other potential contamination.
Shelf Life : 12 months from the date of production

Labeling :

Batch or lot number is clearly indicated on each package and/or delivery documents.

Country of Origin : USA

Typical Analysis :

Chemical Properties	Minimum	Typical	Maximum
Crude Protein	65.0%		
Crude Fat	8.0%	10.0%	13.0%
Crude Fiber		2.0%	2.5%
Ash		14.0%	18.0%
Moisture		7.0%	9.0%
Pepsin Digestibility		90.0%	
Calcium			4.0%
Phosphorus		1.9%	
Methionine	1.3%		1.8%
Tryptophan		0.5%	
Cysteine		1.9%	
Isoleucine		2.5%	
Lysine	3.5%		4.8%
Threonine		2.5%	
Arginine		4.1%	
Histidine		1.2%	
Leucine		5.0%	
Valine		3.6%	
Phenylalanine		2.2%	

Physical Characteristics :

Color	:	Light to medium brown
Form	:	Powder
Aroma	:	Typical fish smell

Usage : For use in Poultry, Fish Feed etc.

Dosages: Dosages may vary on each in-house nutritional formulation of each Feed mill. Recommended dosages are as follows :

Starting Chicks	:	5 to 7%
Layer	:	2 to 5%
Broiler	:	4 to 6%
Breeder	:	4 to 6% of the diet
Fish	:	5 to 9%

Manufacturing of WILPRO :

WILPRO 65 is produced at Wilbur Ellis's facility in the United States of America, which does not store, handle, or process any ruminant ingredients that include bovine and porcine and materials derived from them. The product is prepared, processed, stored, and otherwise handled in a manner to avoid contamination with ruminant tissues. The ingredients used in the product are also manufactured carefully using the processing times and temperatures adequate to destroy microbiological pathogens of concern of the ingredients, including Salmonella. The product is manufactured under sanitary conditions, including precautions to prevent contamination of the product with pathogenic agents through the distribution chain. Furthermore, harmful ingredients including but not limited to the compounds such as Chloramphenicol, Nitrofurantoin, and Melamine are not approved for use in animal food in the U.S. A. and are not used in the mixing of WILPRO 65 produced by Wilbur-Ellis. The Facility is not authorized or allowed to handle any antibiotics as it is NOT licensed to handle antibiotics. No antibiotics are used in the production of WILPRO 65 at this facility.

WILPRO 65 is rich in protein contents and no mammalian [Beef & Porcine] materials are included in WILPRO 65. The facility is equipped with an in-house laboratory; all ingredients are evaluated and rejected the ingredient that does not meet the high-quality standards. As a leading Feed Company in the USA, Wilbur Ellis can assure of reliability and consistent delivery of the same, high quality and standard in every lot.
